

WIZARD Ultra Dissolvable Plug

Designed to withstand extreme conditions of high pressure and high temperature (HPHT), rating up to 15,000 psi and 350°F above. These frac plugs may also feature unique geometries and surface treatments, such as enhanced coatings or textures, that improve their performance and durability under corrosive and acidic environments.

FEATURES:

- 15,000 psi
- 350°F and above
- Acid frac application
- Coated variant available
