

WIZARD Ultra Dissolvable Plug

Designed to withstand extreme conditions of high pressure and high temperature (HPHT), rating up to 15,000 psi and 350°F above. These frac plugs may also feature unique geometries and surface treatments, such as enhanced coatings or textures, that improve their performance and durability under corrosive and acidic environments.

FEATURES

- Temperature rating up to 350°F
- Pressure rating up to 15,000 psi
- Acid frac & proppant frac application
- Coated variant available
- Ball-in-place and ball-drop convertible
- Run with standard Baker wireline or hydraulic setting tools
