

Wizard HEDP Dissolvable Plug

Wizard HEDP Dissolvable Plug is capable of passing through 3.5" tubing, expanding up to 90% from its original OD to set inside 4.5"-5.5" casings, without the need for additional equipment for deployment. Wizard HEDP Dissolvable Plug is specialized to perform tasks that even high expansion frac plugs could not, due to extreme downhole restrictions or thru-tubing isolation applications. In some extreme cases where geological activities have caused casing collapse, some completions were forced to be abandoned or put on halt, because there are no tools currently available to continue well completion beyond the restriction point. With a fully dissolvable feature, it also minimizes post-completion intervention risks, further reducing completion costs and time under such challenging scenarios.

FEATURES

- 7,000 psi
- 140 – 330°F
- Customized hydraulic setting tool (included)
- Full metal seal, No elastomer components
- Fully dissolvable
- Run with coiled tubing

SPECIFICATIONS

Casing Size	Casing Weight (lb/ft)	Casing Grade
4.5"	9.2 - 12.6	N80

5"	13 - 24.2	P110
5.5"	26.8	Q125
		140V
