

iRCD Pro Max

Vertechs iRCD Pro Max is an electric integrated wellhead pressure control system, upgraded from iRCD Pro to support micro-flow, deepwater, and other specialized operations. It expands pressure control capabilities from WBP to PMCD, FMCD, and MPC, fully replacing the functions of RCD and MPD manifolds with a single solution. Enhanced by intelligent control algorithms, iRCD Pro Max delivers greater flexibility, precision, and safety while reducing maintenance requirements and operational risks. It is customizable for land rigs, modular rigs, and jack-up rigs, improving overall efficiency, reliability, and cost-effectiveness.

FEATURES

- Enable transition from WBP to PMCD, FMCD, and MPC
- Integrate all functions of iRCD and IPC-MPD systems in a compact system ($\leq 7\text{m}^2$) with ± 15 psi pressure control accuracy
- Reduce deployment time by 60%, crew by 50%, and costs by 30%
- Upgrade service available from iRCD Pro to iRCD Pro Max
- Applicable to land rigs, modular rigs, and jack-up rigs
